#### Shirahama Port Uranomae Port Sakurajima Island Man One of the popular fishing spots. You can enjoy At this port, you can see Shinjima the volcano in a beautiful triangle shape from here. Island created by seafloor elevation during an eruption in the Edo period. A liner ship to the island As the shape is quite different from the iconic one you see from the city center of Kagoshima, even some locals may not recognize it as Sakuraiima . denarts from here 36 km around Sakuraiima - Higashi Shirahama Bus Stop 4 hour by car 🦓 4 hours by bicycle 🕻 9 hours on foot Sakurajima Shirahama Onsen Center 4 Sakurajima H Tagiri Café Shirahama Oho Elementary School Sakuraiima Coffee & Bakery Kagoshima City Hall Sakurajima Branch Fujino Ako Grove Sakurajima Junior High School Shinjima island Uranomae Port G Sakurajima Daikon Radish Field Bread An-ei Lava Booth8 (1779)Sakurajima Ferry Terminal (Sakurajima Port) • Chinman (Restaurant) A Sakurajima Visitor Center Oshu Elementary School Bunmei Lava Sakurajima Sea Fishing Park Kurokami Elementary School North Peak Sakuraiima Yogan Nagisa Park 1,117m Yunohira Observatory B Tsukiyomi Shrine U Kurokami View Spot Nan-ei Lease Sakurajima Field Tsubaki-no-Sato (Yogan Ground) Lava Road (national route 224) (Restaurant) Buried Shrine Gate in Kurokami Middle Peak Kurokami Chugakko Mae Bus Stop Showa Lava Kurokami Junior High School -▲ 1,060m Narasujima Observatory Taisho Lava Shioyagamoto Port Showa Crater Akamizu Yunohiraguchi C Yogan Nagisa Trail South Peak Super Magma Road Sakurajima Yogan Kako Center (Lava Craft) 1,040m Murayamatogei (Pottery) Akamizu Observatory Square Ogakutogei (Pottery) Tabinoeki Sakurajima Kanze Sakurajima Souvenir Shop : Sakurajima International Volcanic Sabo Center An-ei Lava Taisho Lava (1914)(1779)Bunmei Lava Yogan Tenbosho Mae Bus Stop Bungakuhi Mae N Eruption Memorial at Higashisakurajima Elementary School Sakurajimaguch Arimura Lava Observatory Furusato Arimura Beach Park Kaishin To Kirishima-City -Bus stop (Island View Bus) Yuno Port - Yogan Bus stop (Local Bus) Sakuraiima Kagoshima City Hall -Evacuation port Higashi-Sakurajima Branch Traffic light **Insights of** Sakurajima Hotel A Bathroom Okogajima island Higashi Sakurajima Restaurant **Evacuation Port** Junior High School Gas station Small or big in scale, Sakurajima erupts almost everyday. Meanwhile approx. 3,500 residents live their "normal" life at the foot of the volcano. Evacuation ports are built for them as a preparation against a large eruption that can Shioyagamoto Port 4 Yuno Port occur once in a hundred or thousand years. So far, The combination of the stone walls, port See the mystic emerald green color of the fortunately, these ports have never been used for and trees creates a special type of sea surface made from the hot spring evacuation purposes. Each and every evacuation port gushing out from the sea floor. The level of beauty. It is a great place to take a stroll. has its unique scenery. Find the wonderful points of each You can also see how people live on the vegetation varies because fhe lavas on either 500 1000m port for a unique experience. side of the port are from different periods.

## Highlights!

## A Sakurajima Visitor Center

As the base facility of the geopark, the center introduces the history of

available here.
■ 10 mins on foot from Sakurajima Port TEL: 099-293-2443
Free Admission Open everyday 9:00 - 17:00 Parking for 10 cars

### B Tsukiyomi Shrine

This is the largest shrine on Sakurajima. It faces inland (towards the volcano). It was buried under lava flow during the Taisho Eruption (1914), and rebuilt at the current location in 1940.

2 mins on foot from Sakuraiima Port TEL: 099-293-2109 Parking for 20 cars

## C Yogan Nagisa Trail

3 km-long trail between Sakurajima Yogan Nagisa Park and Karasujima Observatory shows you flora on the Taisho lava (1914).

10 mins on foot from Sakurajima Port
TEL: 099-298-5111 (Tourism Exchange Center)
Parking for 20 cars Free Admission

## ■ Karasujima Observatory

Karasujima, once an isolated island in the bay, was covered with lava during the aisho Eruption (1914). Flora has rebounded on the barren lava field since then

■ 35 mins on foot or 4 mins by car from Sakurajima Port TEL: 099-298-5111 (Tourism Exchange Center)

## E Yunohira Observatory

The observatory is situated at the highest point on Sakurajima that the general public can access (4th station: 373 m on North Peak). Enjoy the

overwhelming view.

■ 15 mins by car from Sakurajima Port TEL: 099-298-5111 (Tourism Exchange Center) Free Admission Open everyday 9:00 - 17:00 Parking for 30 cars

## F Sakurajima Komikan Field

"Sakurajima Komikan" is a unique satsuma orange in its small size and strong sweetness. It's a blessing from the volcanic alluvial fan created by debris flow. Soil with good drainage makes the satsuma tasty. Harvest season: December - January

#### G Sakurajima Daikon Radish Field

Sakurajima Daikon has a Guinness World Record for the heaviest radish They grow even in harsh fields with pumice from volcanic eruptions. Harvest season: January - February

## H Tagiri (volcanic hydrothermal activity)

Local fishermen call this phenomenon "Tagiri". It is a unique spot to see bubbles from a submarine volcano rise to the sea surface.

## Shinjima island

The island was formed by the uplifted seafloor during the An-ei Eruption, while other islands around were formed by lava flowing from the ground. Some contain layers of shell fossils from 5,000 years ago.

## U Kurokami View Spot

The observatory is a good view spot to see the Showa lava and Showa crater.

#### K Buried Shrine Gate in Kurokami

The torii gate was buried two meters in just one day during the Taisho eruption The forii gate was buried two meters in just one day during the Taisho eruption The shrine is located in the back, and the surrounding forest is the oldes forest in Sakurajima. The ecology of the chinquapin trees, which were buriet in the eruption but have come back to life, is unique.

30 mins by car from Sakurajima port

TEL: 099-298-5111 (Tourism Exchange Center) Parking for 7 cars

### Sakurajimaguchi

↓ To Tarumizu-City

Lava flow connected the island and the mainland during the Taisho eruption (1914). You can distinguish the flora on Osumi Peninsula and the lava-cover area. Seto Village, buried under the lava, was the place where the first Japane western-style battleship, the Shohei Manu, was built at the end of Edo period.

20 mins by car from Sakurajima port / Parking is available

### M Arimura Lava Observatory

Good place to view the Taisho and Showa lava. Check out distinct flora on them. There is geopark exhibition in the rest house, as well.

20 mins by car from Sakurajima port
TEL: 099-298-5111 (Tourism Exchange Center) Parking for 15 cars

## N Eruption Memorial at Higashisakurajima Elementary School

This memorial (a.k.a. the monument of distrust of science) tells us the precursors and destruction caused by the Taisho Eruption, an precautions and destruction caused by the Taisho Eruption, an precautions for an upcoming eruption. The words "Do not rely on sci theory..." made this monument famous in Japan.

10 mins by car from Sakurajima port / No parking
